Dear Louise,

Hook Moor Wind Farm, Micklefield, Leeds
Planning Application Number: P/08/01118/FU/MIN

I wish my **SUPPORT** for the Hook Moor Wind Farm planning application (Planning Reference: 08/01118/FU) to be officially placed on record.

My reasons for support are:

- The application will result in a significant reduction in CO₂ emissions, which will help this country to meet its current Kyoto targets for reducing CO₂ emissions, helping stop global warming.
- The application will allow Leeds City Council to take a huge step towards meeting its renewable energy target, powering over 8000 homes.
- In the highly urbanised Leeds Area, suitable sites for wind energy are limited. If this site is unsuccessful the planning risk associated with other sites is likely to be much greater.
- Greenfield sites in the East Leeds area are under pressure from open cast mining which will have a much more profound environmental legacy than the 25 year life span of wind turbines.
- The application is in line with Government Energy policy, as detailed in PPS22 on Renewable Energy.
